MATERIAL SAFETY DATA SHEET

Product name: PHOSFLEX 321
Product id: 7024
Revision date: 26/08/2015
Supersedes: 22/03/2009
Revision: 2

1. Identification of the substance & the company

Chemical name: Proprietary blend of phosphate esters
Type of product and use: Flame-retardant plasticizer
Supplier: ICL-IP America Inc.
622 Emerson Road - Suite 500
St Louis, Missouri 63141, USA
Tel:(314)983-7884 Fax:(314)983-7607
Emergency Telephone: Chemtrec (800)424-9300

2. Hazards identification

Emergency overview: May cause mild irritation to the eyes. May cause skin and respiratory tract irritation. May cause liver, kidney, adrenal and testicular toxicity after repeated exposures. May release harmful vapors at elevated temperatures.

NFPA Ratings (Scale 0-4): Health = 1, Fire = 1, Reactivity = 0
HMIS Ratings (Scale 0-4): Health = 1*, Fire = 1, Reactivity = 0.

3. Composition / information on ingredients

MATERIAL SAFETY DATA SHEET

Product name: PHOSFLEX 321
Product id: 7024
Revision date: 26/08/2015
Supersedes: 22/03/2009
Revision: 2

4. First-aid measures

Eye contact
Holding the eyelids apart, flush eyes promptly with copious flowing water for at least 20 minutes. Get medical attention immediately.

Skin contact
Remove contaminated clothing. Wash skin thoroughly with mild soap and plenty of water for at least 15 minutes. Wash clothing before re-use. Get medical attention if irritation occurs.

Inhalation
In case of inhalation, remove person to fresh air. Keep him quiet and warm. Apply artificial respiration if necessary and get medical attention immediately.

Ingestion
If swallowed, wash mouth thoroughly with plenty of water. Get medical attention immediately.

************************************************************************
NOTE: Never give an unconscious person anything to drink.
************************************************************************

Notes to the physician
Repeated exposure to very high doses of this product may result in cholinesterase inhibition. Additional symptoms resulting from the repeated exposure could include salivation, sweating, headache, nausea, diarrhea and tremors. Should cholinesterase inhibition occur, atropine may be used as an antidote.

5. Fire - fighting measures

Suitable extinguishing media
Water, water fog, carbon dioxide (CO2), dry chemical, foam

Fire fighting procedure
Fire fighters should wear full protective clothing and self-contained breathing apparatus (SCBA). Contain runoff to prevent entry into water or drainage systems.

Unusual fire and explosion hazards
When heated to decomposition, may release poisonous and corrosive fumes of Carbon Dioxide, Carbon Monoxide, Hydrogen Chloride and Phosphorus Oxides.

6. Accidental release measures

Personal precautions
Wear appropriate safety clothing and eye/face protection (see Section 8) Slipping hazard due to spilled product
MATERIAL SAFETY DATA SHEET

Product name: PHOSFLEX 321
Product id: 7024
Revision date: 26/08/2015
Supersedes: 22/03/2009
Revision: 2

Methods for cleaning up
Soak up with sand or other suitable absorbant and dispose of as solid waste. Collect in suitable and properly labeled containers. Ventilate area and wash spill site after material pickup is complete.

Environmental precautions
Prevent product from entering drains, ditches and rivers.

7. Handling and storage

Handling
Wear protective clothing including chemical goggles and rubber gloves when handling this product to avoid eye and skin contact. Handle in a well-ventilated area. Avoid breathing vapors. Avoid bodily contact.

Storage
Store in a dry, cool, well-ventilated area away from incompatible materials (see "materials to avoid"). This material is noncorrosive to glass or metals. However, because the material has plasticizing properties, it may soften or deteriorate certain plastics and elastomers (particularly vinyl-based resins, neoprene and natural rubbers). Prolonged storage at elevated temperatures under wet alkaline or acidic conditions should be avoided to assure product integrity. Care should be taken to prevent moisture condensation in the container. Carbon steel is the preferred material of construction for storage containers. The product is normally shipped in unlined tank cars, trucks and drums.

8. Exposure controls / personal protection

Exposure Limits:

Revision date: 26/08/2015
Supersedes: 22/03/2009

Revision: 2

Ventilation requirements
Ventilation must be sufficient to maintain atmospheric concentration below recommended exposure limit.

Personal protective equipment:
- Respiratory protection
  Use a NIOSH-approved organic vapor/acid gas respirator (OVAG) with dust, mist and fume filters to reduce potential for inhalation exposure if use conditions generate vapor, mist or aerosol and adequate ventilation (e.g., outdoor or well ventilated area) is not available. Where exposure necessitates a higher level of protection use a NIOSH-approved, positive pressure, pressure demand, air-supplied respirator.
- Hand protection
  Neoprene gloves
- Eye protection
  Chemical safety goggles
- Skin and body protection
  Body covering clothes and boots

Hygiene measures
Safety shower and eye bath should be provided. Do not eat, smoke or drink where material is handled, processed or stored. Wash hands carefully before eating or smoking.

11. Toxicological information

Acute toxicity:
- Rat oral LD50: 2830 mg/kg (component)
- Rabbit dermal LD50: > 2000 mg/kg (components)
- Rat inhalation LC50: > 5 mg/l (heated aerosol)
- Eye irritation (rabbit): Mild irritant (similar product)
- Dermal irritation (rabbit): A component in this product did produce primary skin irritation in human volunteers. Was found to be a mild irritant in rabbits

Dermal sensitization: A component in this product did not cause allergic skin reactions in tests with human volunteers.

Target organ effects: Based on animal studies, may cause liver, kidney, adrenal and testicular toxicity after repeated exposure.

Sub-chronic toxicity: A 90-day study (rabbit, dermal application of 1450 mg/kg) produced an increase in kidney weight, but no histological changes in any tissue. A 90-day study (rat, oral doses of 25 or 250 mg/kg/day) produced mortality and an increase in liver and kidney organ weights, but no histological changes in any tissue.

Chronic toxicity: NOEL: 5 mg/kg/day (rat) Certain high dose female rats showed plasma cholinesterase inhibition of up to 30 percent

Mutagenicity: Mutagenic by the Ames Test
- Unscheduled DNA synthesis (rat liver) - not mutagenic
- Not mutagenic in the mouse lymphoma L5178Y test system.
- Negative in the Chromosomal aberrations test (hamster’s V79 cells)
- Not clastogenic in chromosome aberration test with Chinese hamster cells.
- In vivo mouse bone marrow cytogenicity: not mutagenic
- In vivo Drosophia melanogaster test: not mutagenic

Carcinogenicity: Not classified by IARC
- Not included in NTP 11th Report on Carcinogens
- Not classified as a carcinogen by USA OSHA
- Triphenyl Phosphate/Butylated Triphenyl Phosphate Mixture was tested in an in vitro malignant transformation assay using BALB/3T3 cells. It did not induce morphological transformations and thus did not exhibit carcinogenic potential in this assay. For Alkyl Phosphate Ester: Daily ingestion of 20 mg/kg or 80 mg/kg for two years was oncogenic to rats. No significant effects were observed at 5 mg/kg/day. Microscopic examination of the tissues and organs of the mid and high dose animals revealed significant increases in the incidence of liver nodules, benign renal cortical tumors and interstitial cell tumors or the testes. Females receiving the high dose showed an increase in adrenal cortical adenomas. No significant increase in tumor incidence was observed in the low dose animals. The substantial decrease in body
weights seen in the high dose animals confirmed that the Maximum Tolerated Dose was achieved, and possibly exceeded. Although there was a significant increase in the incidence of benign tumors in mid and high dose animals, the lack of a significant incidence of malignant tumors in any treatment group confirms that the proprietary phosphate ester did not demonstrate carcinogenic activity. This is consistent with the results of the mutagenicity tests which show the product is not a genotoxin and thus not a genotoxic carcinogen.

Reproductive toxicity
Reproductive studies showed that oral administration of this product to male rabbits for 12 weeks did not adversely affect fertility or sperm quantity.

Teratogenicity
Not teratogenic

Neurotoxicity
Not neurotoxic

12. Ecological information

Aquatic toxicity:
- 96 Hour-LC50, Fish
  [220352-35-2] Butylated triphenyl phosphate mixture
  > 2 mg/l (Rainbow trout)
  Proprietary Alkyl Phosphate Ester
  1.4 mg/l (Oncorhynchus mykiss)
  Proprietary Alkyl Aryl Phosphates
  14 mg/l (Fathead minnow)

- 48 Hour-EC50, Daphnia magna
- 96 Hour-IC50, Algae
- Hydrolysis
  Hydrolysis rates for triphenyl phosphate, a product component are:
  at pH 9.5: half-life: 0.23 days
  at pH 8.2: half-life: 7.5 days

13. Disposal considerations

Waste disposal
Observe all federal, state and local environmental regulations when disposing of this material

Disposal of Packaging
Dispose of in a safe manner in accordance with local/national regulations.
MATERIAL SAFETY DATA SHEET

Product name  PHOSFLEX 321
Product id  7024
Revision date  26/08/2015
Revision: 2
Supersedes  22/03/2009

14. Transportation information

UN No.  3082
DOT  
Proper shipping name: Environmentally hazardous substances, liquid, n.o.s (contains Triaryl Phosphates)
Class: 9 - Miscellaneous Hazardous Material
Label: 9
Packing Group: III

Not regulated for surface and air transport in non-bulk (<119 gallons) packagings.
(contains triphenyl phosphate which is a Marine Pollutant per 49CFR 172.101 Appendix B)

IMO  
Proper shipping name: Environmentally hazardous substance, liquid, n.o.s (contains Triaryl Phosphate)
Class: 9 - Miscellaneous Dangerous Substances and articles
Label: 9
Packing Group: III
Marking: MARINE POLLUTANT (PP)

ICAO/IATA  
Proper shipping name: Environmentally hazardous substance, liquid, n.o.s (contains Triaryl Phosphate)
Class: 9
Hazard label(s): Miscellaneous
Packing group: III

15. Regulatory information

- USA  
Reported in the EPA TSCA Inventory.

- SARA 313  
This product does not contain a chemical listed at or above de minimis concentrations.

- California-Prop 65  
WARNING: This product contains a chemical(s) known to the State of California to cause cancer, or birth defects or other reproductive harm (concentration < 0.1%)

- Waste Classifications  
This material does not meet RCRA's characteristic definition of ignitability, corrosivity, or reactivity, and is not listed in 40CFR 261.33.

- Workplace Classification  
This product is considered hazardous under the OSHA Hazard Communication Standard (29CFR 1910.1200).

Canada  
Listed in DSL
MATERIAL SAFETY DATA SHEET

Product name: PHOSFLEX 321
Product id: 7024
Revision date: 26/08/2015
Supersedes: 22/03/2009

WHMIS hazard class: D2B toxic materials
EU: Reported in EINECS
Japan: Listed in ENCS
Australia: Listed in AICS
New Zealand Inventory: Listed in NZIoC
China inventory: Listed in IECSC
Korea: Listed
Philippines: Listed in PICCS

16. Other information

Health, Safety & Environment Policy
We will strive to ensure that our operations and products meet the needs of the present global community without compromising the ability of future generations to meet their needs.
We accept that the success of our business is dependent on the supply of products and services that will benefit society whilst ensuring human safety and protection of the environment and natural resources.
Within the framework of our commitment to the Responsible Care program, we will provide a healthy and safe work environment for employees and will responsibly manage our products at all stages of their life cycle in order to protect human health and the environment whilst maintaining high production standards of operation.

TO MEET THIS COMMITMENT WE WILL:
Comply with or exceed applicable national and international regulatory requirements and other requirements to which we subscribe.
Communicate openly and actively encourage dialogue with employees, customers and community concerning our products and operations.
Implement documented management systems consistent with and for promotion of the Responsible Care ethics.
Develop and supply products that can be manufactured, transported, used and disposed of safely whilst best meeting the needs of our customers.
Regularly assess, continually improve and responsibly manage health, safety and environmental risks associated with products and processes throughout their life-cycles.
Share knowledge and expertise with others and seek to learn from and incorporate improved practices into our own operations.
Educate and train employees, contractors and customers to improve their HSE performance.
Communicate up-to-date information to enable our workers, customers and other interested parties to handle our products in a safe and environmentally responsible manner.
Endeavor to work with customers, suppliers, distributors and contractors to foster the safe use, transport and disposal of our chemicals.
Support Product Stewardship programs in cooperation with customers, distributors and transporters.
